

# Y

**Y:** A "Y" shaped plumbing fitting.

**Yard:** An open space on the same lot with a building.

**Yard Lumber:** Lumber of those grades, sizes, and patterns which are generally intended for ordinary construction, such as framework and rough coverage of houses.

**Yard of Concrete:** One cubic yard of concrete is 3'x3'x3' in volume, or 27 cubic feet. One cubic yard of concrete will pour 80 square feet of 3 ½" sidewalk or basement/garage floor.

**Yoke:** The location where a home's water meter is installed between two copper pipes, and located in the water meter pit in the yard.
